

### **Thoroughbred Stud breeding package for 2021**

An all inclusive package for each brood mare (in foal, barren and maiden mares) of £460 +VAT (£552.00 all inclusive) is being offered. This relates to all boarding mares who will be resident staying at the stud until pregnant. This does not apply to walk-in mares. This package is for three oestrus cycles and relates to reproductive work only.

#### **What is included:**

1. Endometrial swabs prior to cover.
2. Manual and ultrasonographic examination of the reproductive tract pre and post breeding.
3. Treatment for post mating uterine fluid and endometritis, if necessary.
4. Pregnancy diagnosis (transrectal palpation and ultrasonography)
5. Twin management/reduction.
6. Caslick operations.
7. Drugs which are included:
  - Prostaglandin, oxytocin, basic intra-uterine antibiotic treatments\* (e.g. penicillin and framomycin) and flushes both pre-and post-mating, Chorulon® injections to assist with ovulation

#### **What is **not** included**

1. Clitoral CEM swabs, EVA and EIA blood samples and all the external laboratory fees associated with these tests.
2. Any drugs to aid pregnancy maintenance (Regumate®, Receptal® and systemic antibiotics given parenterally or orally).
3. Regumate® and PRIDS to enable the mare to commence cycling.
4. Ovuplant® and Suprefact® to assist with ovulation.
5. Any spasmolytic drugs or sedatives used to enable examination of the ovaries or uterus to be carried out.

**BOURTON VALE**  
equine clinic

Wyck Rd, Lower Slaughter,  
Cheltenham, Gloucestershire,  
GL54 2EX  
01451 820137  
www.bvec.co.uk

6. Sedatives to enable the mare to be mated (covered).
7. Any foal treatment whatsoever (i.e markings, micro chipping, emergency surgery, hernia treatment etc.).
8. The stud season officially ends on the 15<sup>th</sup> July as does this package.
9. Any other orthopaedic or medical treatments.

\* In some cases where the mare has been covered and failed to conceive, the vet in charge may decide the use of Excenel<sup>®</sup> antibiotic is necessary. The Excenel<sup>®</sup> will be charged at an additional cost.

*If the mare has not conceived in the previous two years but has visited a stallion then a full breeding history, with all diagnostic procedures that have been carried out will need to be disclosed. Bourton Vale Equine Clinic reserves the right to exclude any mare from this financial package at the attending veterinary surgeon's discretion following initial examination. If your mare is not in foal after three oestrus cycles then you will be contacted and a decision to continue, as well as approximate costs will be discussed with you.*

The payment for this package has to be submitted to Bourton Vale Equine Clinic prior to the mare arriving at the stud. No veterinary work will commence without prior payment.
