BREEDING PACKAGES 2026: THOROUGHBRED

Rissington Equine Clinic are offering a comprehensive broodmare package for the 2026 breeding season.

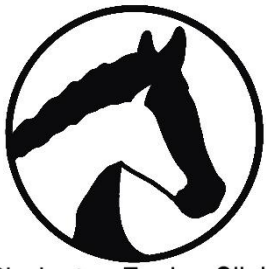

Package Summary:

- Suitable for boarding mares who will be resident at the stud until confirmed pregnant, i.e. this does not apply to visiting / walk-in mares.
- Available for broodmares in foal, barren, and maiden mares.
- This package covers three oestrus cycles and relates to reproductive work only.
- This package will conclude when the stud season official ends on the 15th of July 2026.

What is Included:

- Routine stud visits.
- Endometrial swabs and overnight cultures prior to cover.
- Manual and ultrasonographic examination of the reproductive tract pre and post breeding.
- Pregnancy diagnosis (transrectal palpation and ultrasonography).
- Treatment for post-mating uterine fluid and endometritis, if necessary.
- Twin management/reduction.
- Caslick operations.
- Drugs which are included*: Prostaglandin, oxytocin, basic intra-uterine antibiotic treatments ** (e.g. penicillin, gentamicin), corticosteroids and uterine flushes both pre and post mating.

* In some cases, alternate or similar drugs may be used. ** Where the mare has been covered, but failed to conceive, Excenel ® or Cefazolin ® antibiotics maybe used at the discretion of the vet in charge. These drugs will be charged at an additional cost.

What is NOT Included:

- Sedatives or spasmodic drugs used to enable examination of the ovaries and reproductive tract to be carried out.
- Clitoral and Cervical CEM swabs, EVA and EIA blood samples and all the external laboratory fees including postage charges associated with these tests.
- Drugs to aid pregnancy maintenance (Regumate ®, Receptal ® and systemic antibiotics given parentally or orally).
- Drugs to enable the mare to commence cycling, such as Regumate ® and PRIDS.
- Drugs to assist with ovulation, such as Deslorelin ® (Ovuplant and Suprafact ®)
- Sedatives to enable the mare to be covered.
- Other orthopaedic or veterinary treatment including routine vaccinations, worm egg count testing as requested by the stud.
- Any foal treatment whatsoever, such as markings, micro-chipping, emergency surgery, hernia treatment, vaccinations etc.
- Any treatments after the stud season official ends (15-07-2026)

Further Information to Consider:

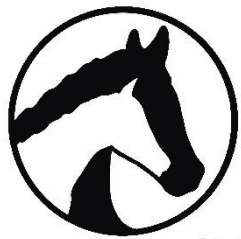

- If your mare is not in foal after three oestrus cycles then you will be contacted and a decision to continue, as well as approximate costs, will be discussed with you.
- Please note that Rissington Equine Clinic Ltd reserves the right to exclude any mare from this financial package at the attending veterinary surgeon's discretion following initial examination.
- A veterinary and breeding history will need to be disclosed if the mare has not conceived in the previous two years but has visited a stallion.
- **No veterinary work will commence without confirmed payment to Rissington Equine Clinic.**
